MEMBRANA IS A DECENTRALIZED FINANCE ECOSYSTEM

Membrana is developed for investors and traders, to contact directly and conclude secure, mutually beneficial and reliable contracts.

THE PROBLEM

95% of cryptomarket participants are losing assets. There are no safe tools for asset management.

- **Loss of control over invested funds**
  To get his assets in trust management, investor need to send them to 3rd party or to a trader

- **Middleman issues**
  There is no tool for independent portfolio managers to bring money under their management

- **Lack of transparency**
  Investor can't get any proof of traders activities. Trader can send him fake data and get the profi

THE SOLUTION

To establish trusted connections between profitable traders and other cryptomarket participants. Provide secure tools for asset management.

- **Unique smart-contract trust management algorithm**.

- Trader never possesses investor's money. He receives **temporary access for trading** with investors funds through platform interface

- All data is transparent and stored in the blockchain. **Verification of trader's ROI** and their past activity

CUSTOMERS

- 3000+ customers on **beta version** with more than $1M in management
